Use-Case Specification: Select Calendars

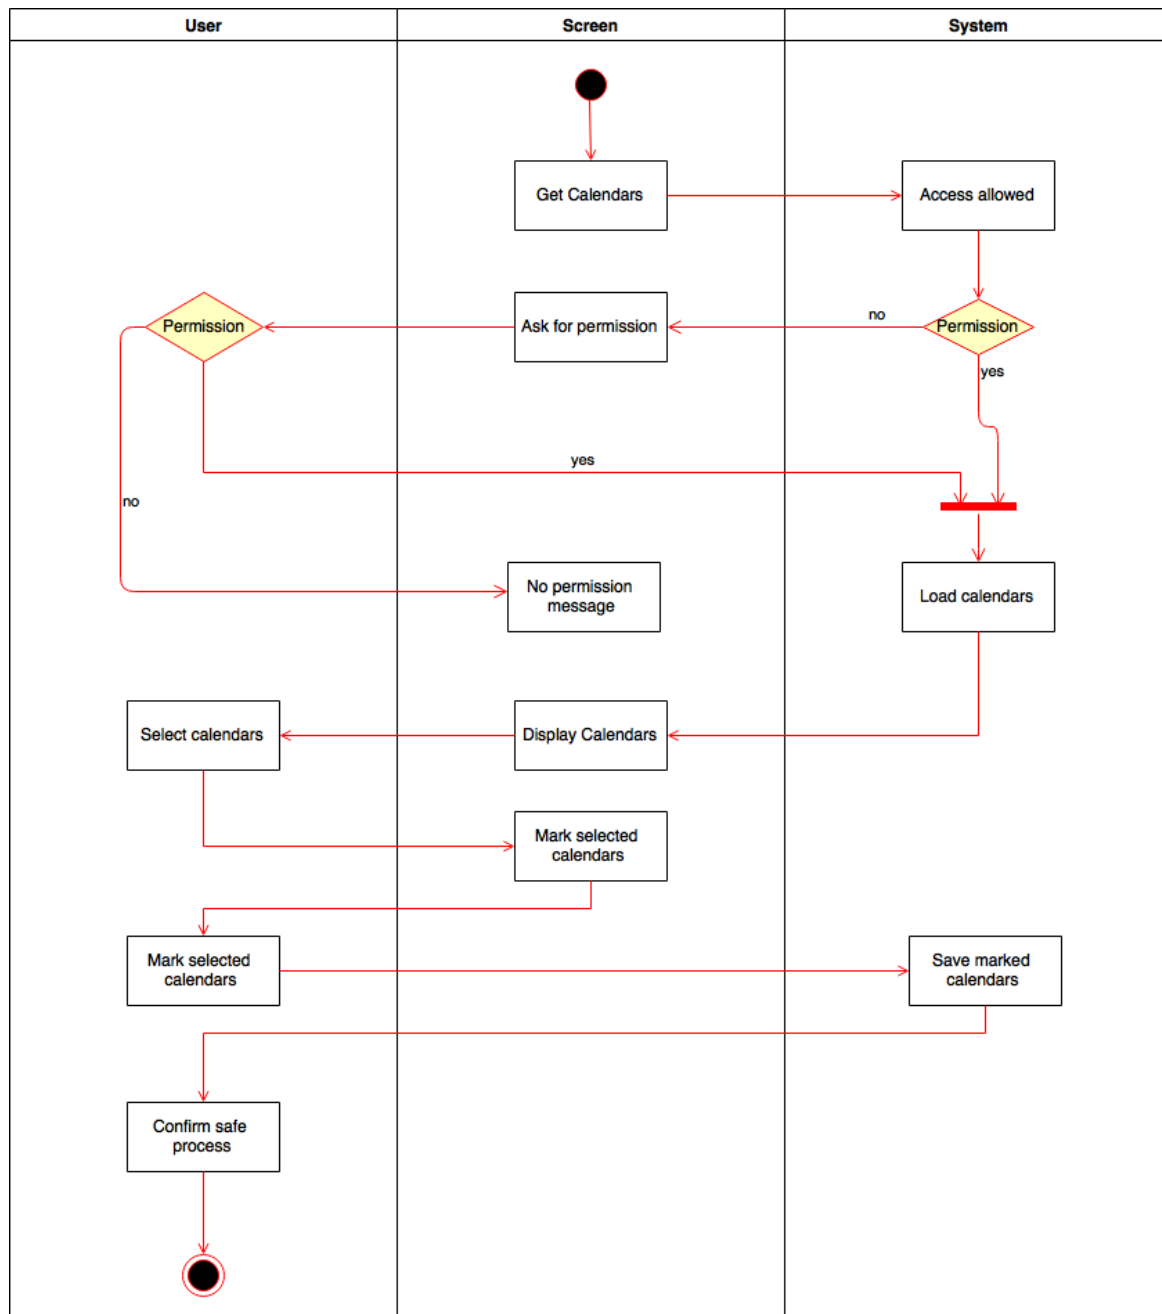

1. Select Calendar

1.1 Brief Description

This Use Case provides the possibility for the users to select the OS calendars containing the appointments for wake up time calculation.

2. Flow of Events

Within the Initialization of the Smart Alarm the User is asked to select all his OS Calendars he wants the app to calculate in. It is confirmed by continuing to the next page.

iOS Mock Up:

Mockup 1 Computer Design from Sketch

Mockup 2 Hand drawn Design

Simple Habits	Version: 1.4
Use-Case Specification: Select OS Calendar	Date: 15/04/17

Feature Files:

```

Feature: Select Calendars

  In order to create a smart alarm
  As a User
  I want to select the calendars containing the events which are relevant for my wake up time

Scenario:
  #Calendar not selected
  Given Menu with button "Calendarname 1"
  And the button "Calendarname 1" has a gray background color
  When I press the button "Calendarname 1"
  Then The background color of button "Calendarname 1" should change to the calendars color

Scenario:
  #Calendar selected
  Given Menu with button "Calendarname 1"
  And the button "Calendarname 1" has the calendar's color as its backgroundcolor
  When I press the button "Calendarname 1"
  Then The background color of button "Calendarname 1" should change to gray
  
```

2.1 Basic Flow

The user selects one calendar which the SmartAlarm than is based on

2.2 Alternative Flows

3. Special Requirements

The User needs to grant the Application access to their Calendars.

4. Preconditions

Obviously there needs to be a calendar on which the Smart alarm can be based.

5. Postconditions

After the Calendar is selected, the alarm needs to be changed when the calendar changes. There needs to be a direct correlation between the calendar and the alarm

6. Extension Points

7. Function Points
